# BRAYAN FLOREZ

## System engineer and software developer

📍 Bogotá, Colombia    📞 (+57) 3145015493    ✉ brianflorezdev@gmail.com

🐙 BrianFs04    in Brian Florez

## PERSONAL PROFILE

I have been obsessed with the idea of using software to solve practical problems, to me, this is like magic where the only limit is my own imagination and ingenuity. I enjoy working in a team environment, in my past projects experiences I learned team members can contribute different perspectives to solve any problem, this synergy can produce creative and productive results making everything easier to go.

## PROJECTS

**FEB 2021**
**MAR 2021**

### SMILING SCHOOL

Basic implementation of a webpage using HTML, CSS, Bootstrap, JS and, jQuery. It was an interesting project since it was made starting from a mockup in Figma.
- Github link: SmilingSchool
- Preview link: here

**MAY 2020**
**JUN 2020**

### PETSPOT

Web page where pets had a chance to get adopt. It was made using MERN stack (MongoDB, Express, React, and Node)
- Github link: PetSpot

**FEB 2020**
**MAR 2020**

### AIRBNB CLONE (THE CONSOLE)

First part to create a clone of the functionality of AirBnB using Python and its unittest module. It intended to create a basic console with some commands that allows the user to create, destroy, serialize/deserialize objects in JSON)
- Github link: AirBnB (The console)
