@BrayamFS

WHO AM I?

I'm a graduated systems engineer, and software engineer student, I'm passionate about exploring ways technology can provide solutions to any problem. I'm particularly interested in front-end and back-end programming since I think is really fun and amazing to create web pages and their infrastructure giving the expected results

Skill	%
HTML	90%
CSS	80%

PROJECTS

5/2020 – 6/2020   **PetSpot**   **Foundations' stage final project**
This project was developed as part of the final project of the foundation stage at Holberton School in a group of 4 students. It was our first full-stack programming project which consisted of 20 days. It was made using MERN stack (MongoDB, Express, React, and Node).
Github link: PetSpot

2/2020 – 3/2020   **AirBnB clone - the console**   **AirBnB clone project first part**
This project was the first part to create a clone of the functionality of AirBnB, done in partners using Python and its unittest module. It intended to create a basic console with some commands that allows the user to create, destroy, serialize/deserialize objects in JSON).
Github link: AirBnB - the clone

2/2021 – 3/2021   **Web App using JavaScript**   **Last project of the first quarter of the web full-stack spe**
This project was a basic implementation of a web app using HTML, CSS, Bootstrap, JS and, jQuery. It was an interesting project since it was made starting from a mockup in Figma.
